SUMMARY TERMS & DISCLOSURES.....20

Higher Yields + Faster Growth = Larger Cash Flow Tailwind for Investors

Enhancing investor resilience in all market conditions, driving outperformance in 30 years

Strategy: Growth at a Reasonable Price

The strategy is rooted in identifying and investing in **businesses with robust growth potential while ensuring a reasonable valuation**

Investor Benefits

This approach provides investors with **a reliable, consistent and growing income stream**

Projected Pre-Tax Dividend Payment by Year of an Initial \$ 250K Investment with Dividends Reinvested at Historical Growth Rates at Current Dividend Yield

Projected After-Tax Dividend Payment by Year of an Initial \$ 250K Investment with Dividends Reinvested at Historical Growth Rates at Current Dividend Yield

Assumptions:

1. Dividend Durable Growth (DDG), MSCI All Country World Index (ACWI), and S&P Global Dividend Aristocrats Index (WDIV)
2. DDG Yield assumed to be 3.0% with a historical growth rate of 14.0%.
3. The WDIV Yield estimated at 4.9% with a historical growth rate of 6.2%.
4. The ACWI Yield estimated at 1.8% with a historical growth rate of 4.4%.
5. The yield of the 30-year US Treasury Bond is assumed to be 4.8%.
6. The tax rate on dividends is assumed to be 20%, while the tax rate on bond income is assumed to be 40%.
7. Dividends are assumed to have been reinvested at historical growth rates

The Power of Growing Durable Dividend Streams

We believe that by investing in companies with strong fundamentals and a history of dividend growth, we can provide our investors with an investment that will outperform over market cycles

Investment in companies with

1. High-quality businesses
2. Growing Free Cash Flow
3. Increasing dividends distributions

The increasing dividend distributions are then reinvested for additional compounding leading to greater long-term returns

The result is a growing income stream and meaningful returns to Investors

SUMMARY TERMS & DISCLOSURES.....20

DDG Master: Investment Philosophy

A Disciplined Investment Process For Optimal Risk Management

A dedicated, consistent investment process improves decision-making and increases the stability of the portfolio

Reinvestment of Growing Dividends compounds For Long-Term Outperformance

Using financial prudence to construct a portfolio with a dividend yield higher than the market average. This accelerated dividend growth helps achieve significant portfolio compounding through reinvestment, ultimately leading to long-term outperformance.

K.I.S.S.*

Equal Weighted Globally Diversified Portfolio

Investment in 100 equally weighted durable businesses with strong and expanding dividend distributions resulting from growing Free Cash Flows.

Our primary emphasis is on the actual dividend payments and forecasts by company management, which serves as a robust indicator of the investment's sustainability.

We Own Companies Focused On Sustained Growth

We identify and invest in companies focused on sustained growth with more capital than they need. This provides investors with attractive, expanding yield and upside price potential

*K.I.S.S: Keep It Simple and Stupid!

DDG Master: Investment Process

Rigorous ranking and research process prioritizes free cash flow and financial prudence, the keys to identifying the best-run businesses

- 1 Global Stock Universe (11,000 Companies)- Qualitative & Quantitative Screening**
 - Proprietary model screens the universe based on certain dividend and cash flow metrics
 - Add potential companies to review from research publications and 13f filings
- 2 Ranking (3,000 Companies)**
 - Apply proprietary model to rank each company based on strength and valuation metrics surrounding free cash flow, dividend and dividend growth, leverage and profitability
 - Identify those companies most likely to be the fittest
- 3 Dividend Stability & Growth - Fundamentals**
 - Review company financials to validate the ranking metrics and galvanize a long-term opinion on revenue growth and dividend reliability and sustainability
 - Focus on growing revenue, expanding EBITDA margins, decreasing debt, and growing FCF
- 4 Portfolio Construction**
 - Seeks low turnover to optimize tax efficiency while maintaining a disciplined sell structure. Each name is weighted equally upon purchase. Sectors and geographic diversification are considered in building a balanced & sustainable portfolio
 - Dividends are reinvested on a dollar cost averaging basis
- 5 DDG**
 - Durable Dividend Growth Master portfolio designed for financial stability for the long-term investor consisting of 100 globally diversified companies generating more cash than they need

SUMMARY TERMS & DISCLOSURES.....20

Profile

Geographic Diversification - Top countries (Securities)

Sector Diversification vs Benchmarks (Market Value)

Sources: Bloomberg – Master Portfolio (As of Dec 31, 2025)

Characteristics

DDG targets growing free cash flows from high and sustainable profitability...

Sources: Bloomberg – Master Portfolio

Cash Flow Growth (\$)*

The chart below illustrates DDG's dividends increased by 14.0% in the last 6 years [2H FY19-FY25], while WDIV had a 6.2% growth rate. ACWI, on the other hand, saw a 4.4% growth over the same time frame.

*It is assumed that an initial investment of \$250,000 was made in the WDIV and ACWI Benchmarks on July 2nd, 2019, the inception date of the DDG Master Strategy. All dividends received are assumed to be reinvested at the fund's NAV on the payment date. For dividend growth purposes, 2H FY19 dividend cash flow numbers have been doubled to account for dividend growth.

Sources: IB Report and Bloomberg

Performance (1/3)

DDG Master has significantly outperformed S&P Global Dividend Aristocrats Index (WDIV) since inception

Growth of \$250,000

*Inception date of DDG Master: July 2, 2019

Sources: IB Report and Bloomberg

Gross returns presented above include reinvestment of dividends and other earnings but do not reflect the deduction of trading costs, fees, or expenses. Gross of fees returns are supplemental to net returns. Net performance includes the deduction of a 1.0% annual fee, which is the maximum anticipated fee for the portfolios. Account fee includes transaction costs and investment advisory fees. Actual fees may vary, depending upon the applicable fee schedule and client portfolio size.

Trailing Performance (2/3)

DDG Master (Net) has outperformed benchmark WDIV by 390 bps (annualized) since inception and has outperformed ACWI by 59 bps (annualized) over Trailing 5Y basis

| | Trailing 1 Year as of Dec'2025 | Trailing 3 Years as of Dec'2025 | Trailing 5 Years as of Dec'2025 | Since Inception |

Investment Team

Stephen P. Lack

Founder, Chief Investment Officer, Portfolio Manager

Stephen has managed the Lack family office since 1988 as Owner and President of Lack Holdings, a firm established in 1932.

He started his career as an Investment Banker with Merrill Lynch & Co. in New York. He joined Holmes Investments in 1996 as CIO, founded Galapagos Partners in 2007, and became a partner in Corient in 2022 after they purchased Galapagos Partners. Stephen established and manages DDG as a separate RIA since 2022.

Education (1975-1994)

BROWN

Wesley Kubesch, CFA

Portfolio Manager

Wes began his career as the owner of Kubesch & Associates, an insurance and financial services agency. Following this, he worked as an Analyst/Portfolio Manager with Regatta Research & Money Management, where he managed and co-managed equity, balanced, and alternative investment portfolios.

After this, he joined Galapagos Partners. Currently, he serves as a partner at Corient after they purchased Galapagos Partners, and assists in the portfolio management for DDG overseeing research and marketable securities.
